

Mission

Howard Counseling Services, Inc. promotes the well-being of individuals and families in the Chicagoland Area by providing accessible, quality mental health care for children, adults, and their families; utilizing a service system that emphasizes trust, respect, confidentiality, and compassion. As an agency, we are committed to the philosophy that we exist for the betterment of our clients.

History

Our agency started as a small entity subcontracting through J.W and Associates from 1994 through 1996 and Ada S. McKinley from 1996 through 1998. During the year of 1998, the agency became an independent contractor for the Illinois Department of Children and Family Services (DCFS). Although Howard Counseling Services, Inc. continues to be an independent contractor for DCFS and other Private Agencies the agency believes there is even a greater need within the community, where an array of services can be offered to the counties of Cook, Will, DuPage, Kane and McHenry Counties.

Population Served

Our agency serves any individual, family or couple desiring to change their course of life through intensive counseling services. We do not discriminate against race, culture, age, or religion.

Staff Credentials

All services will be provided by highly trained Master Level and Licensed Clinical Social Workers.

Agency Goals

Our goals as an agency is to develop a treatment plan to create and maintain stable living arrangements, by providing behavioral modification, crisis intervention and social skills development that will aid our efforts in helping clients meet their needs and/or in unifying the family system.
